Alcura™

OUR SOLUTIONS

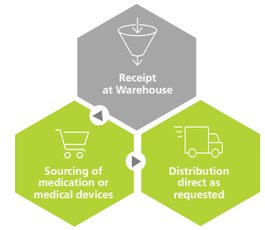
Sourcing of Comparators, Medical Devices and Ancillaries

Supply of medication and medical devices.

Access to reliable medicinal products and materials for clinical trials is key to the success of any clinical trial. As a trusted supplier of comparators, Alcura delivers the right product to customers, at the right time, through:

1. Robust **procurement strategies.**
2. **Direct communication** with the manufacturer.
3. **Supply of products** from the same batch.
4. **Adjusted supply quantity** for each phase.
5. **Support** to short and long term CT.
6. **Cost and time reduction** of supply.
7. **Transport** with specialized supervision.

Pharmaceutical sourcing



- Multi-country global procurement, with local knowledge of requirements and restrictions.
- Access to network worldwide including the supply chain distribution at a local level.
- Decommission of medication - FMD.
- Sourcing directly from manufacturers assuring provenance, integrity and custom manufacturing linked to the different phases of the Clinical Trial.
- Supporting the pharmaceutical sourcing by:

STRICT SUPPLIER AND CLINICAL SUPPLY CHAIN QUALIFICATION PROCESSES

TRACEABILITY, ACCOUNTABILITY, AND RECONCILIATION OF PRODUCTS

SECURE SUPPLY FOR THE DURATION OF THE TRIAL AND PRODUCT SAMPLES AND DOCUMENTATION

PRICING, AVAILABILITY, AND LEAD TIMES INSIGHT

INSPECTION PROCEDURES AND WITHDRAWAL OF PRODUCTS

OUR SOLUTIONS

Clinical Trials Supply Management

Assessment of the design of clinical trails with drugs

Alcura supports more than 300 clinical trials per year.
With our know-how, we can advise and support on:

- Assessing the project management with new approaches to the future.
- Approach to supply chain, manufacturing and distribution.
- Optimization of the design to adjust timeline and costs.

Importer of Record (IoR)

We manage importation in: Europe (EU, UK and Eastern Europe), USA, Asia and Africa, thanks to the excellent knowledge of local requirements allowing to speed-up the importation process.

Primary and secondary packaging

Alcura has the capability to act as CMO manufacturing and releasing batches of drugs for phase I-IV clinical trials.

PRIMARY PACKAGING

MANUFACTURING OF PLACEBO IN SOLID FORMS

AUTOMATED COATING

OVER-ENCAPSULATE OF DRUGS FOR DOUBLE-BLIND TRIALS

PACKAGING (BLISTERS, BOTTLES, VIALS, AMPOULES)

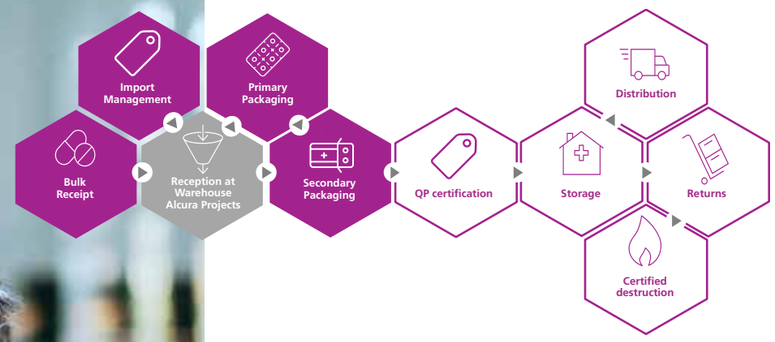
PACKAGING - LABORATORY KITS

BOTTLING OF SOLID FORMS

SPECIAL TEMPERATURE CONTROLLED AREAS FOR PRIMARY PACKAGING

15°C TO 25°C

Alcura can manufacture liquid forms of placebo and reach 2 - 8ºC using a partner in USA.



SECONDARY PACKAGING

DESIGNS OF DIFFERENT KIND OF LABELS (SIZE, LANGUAGES, BOOKLETS)

MANAGEMENT OF LABELLING AND RELABELLING

KIT PRODUCTION

ANY TYPE OF ANCILLARY (BAGS, TUBES, THERMOMETERS, ETC)

DESIGN AND MANUFACTURING OF BOXES

SPECIAL TEMPERATURE FOR SECONDARY PACKAGING

15°C TO 25°C

2°C TO 8°C

-20°C

-80°C*

* Medication will be labelled in a -20ºC room or 2-8ºC with dry ice.

Alcura

QP certification

Our qualified teams handle all investigational drugs in accordance with strict operating procedures to ensure quality throughout the distribution. All our facilities are subject to the supervision of pharmacists and operate according to strict standards operating procedures.

Quality control

1 Once medication arrives to the EU, **a QP Release process is necessary to be completed.** This is mandatory based on EU Regulation (GMP)

2 **Batch testing of medication will be required** when there is no Mutual Recognition Agreement (MRA) between the manufacturing country and EU.

3 Once medication is released it can be **distributed to sites (EU and/or non EU).**

(2°C - 8°C)

Freezer
(-20°C - -80°C)

Cryostorage
(-196°C)

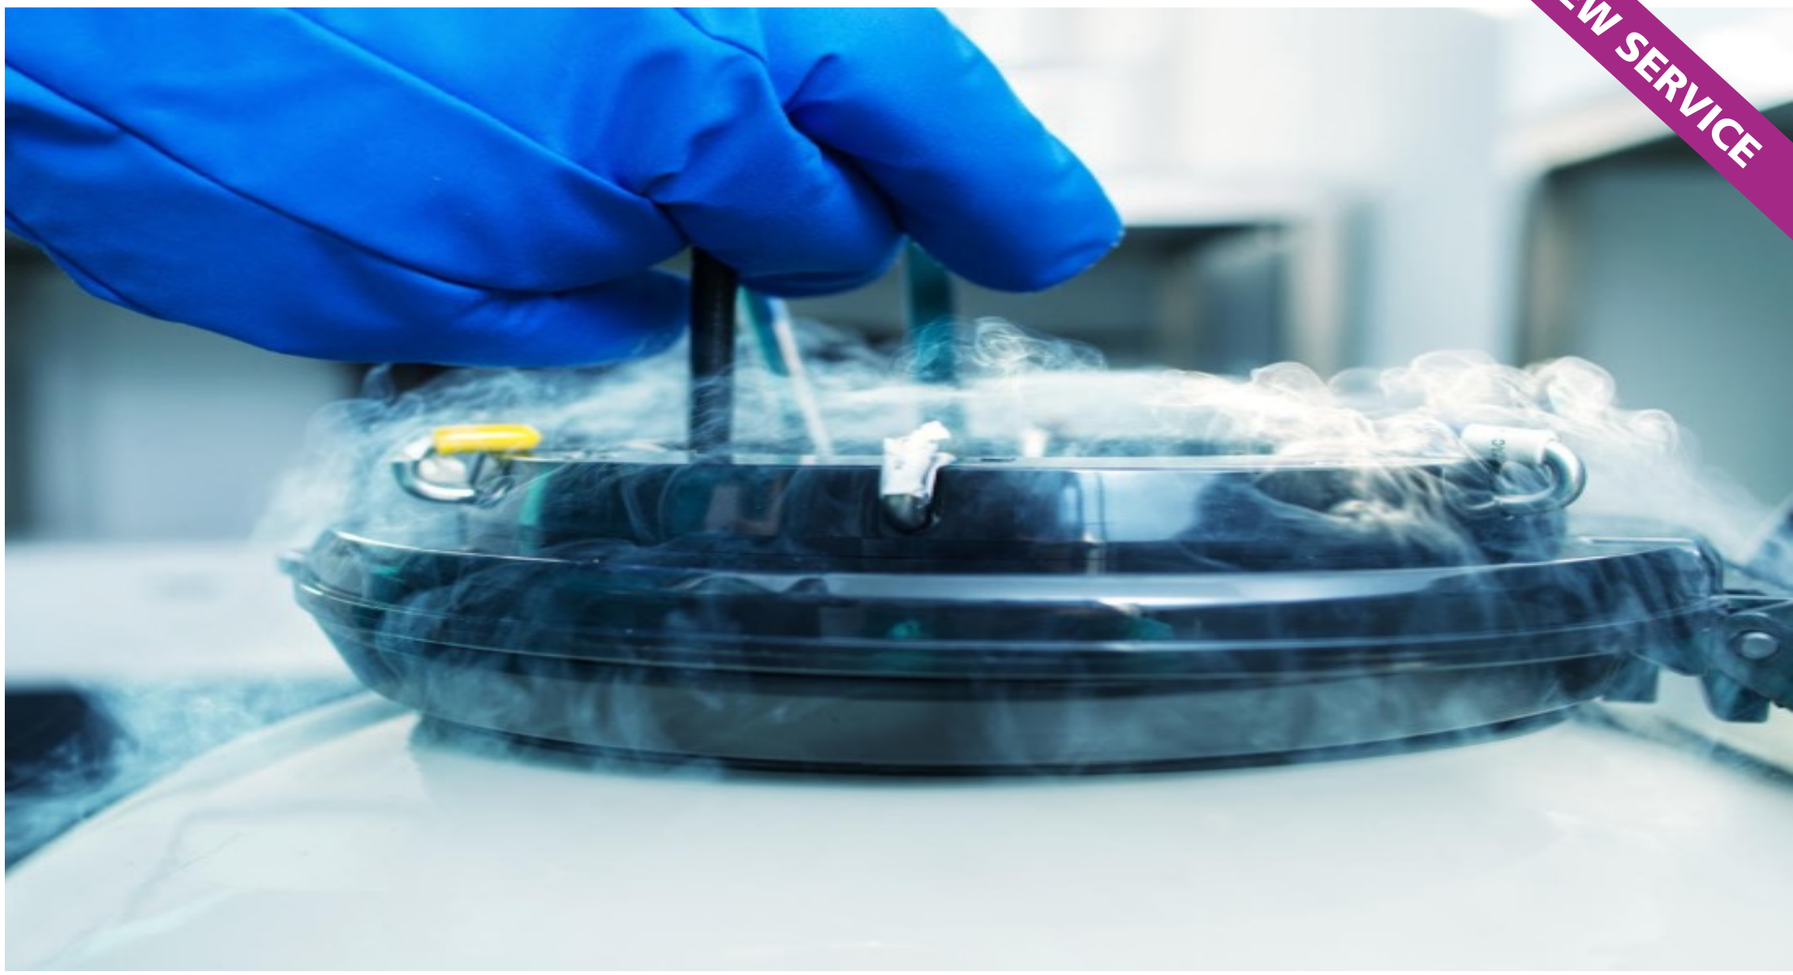
NEW SERVICE

Cell and Gene Therapies Management

Alcura is committed to supporting innovation and new advanced therapies. For this reason, at the beginning of 2023, we launched our new capabilities to manage clinical trials for cell and gene therapies (CGTs).

MIA (Manufacturer's Importation Authorization) enables Alcura to import and release investigational CGTs from any part of the world and ship them in & out of Europe, in all ranges of temperatures, including Cryostorage.

Alcura is driven by versatility when understanding the client requirements offering an End-to-End service for these special therapies.



Cell & Gene Therapy

COLLECTION AND DISTRIBUTION

Delivery of 99.91% of shipments on time and within range.

MANUFACTURER AUDIT

Review of the Supply Chain roles and Qualified Persons **for CGT declaration**.

REGULATORY ASSESSMENT

Regulatory advice in CGT landscape.

RELEASE OF THE THERAPY IN EU

Batch certification of CGT products in EU.

IMPORTATION & EXPORTATION

Import license for CGT medicinal products. Specialized GDP team for CGT services.

STORAGE AND MAINTENANCE

Controlled storage of CGT; **all temperature** ranges including **Cryostorage.**

SECONDARY PACKAGING

Controlled **secondary packaging** of CGT following EU rules.

RETURNS AND DESTRUCTION

Capability to **return and destroy** according to the applicable laws.

Warehouse management (global network)

Distribution capabilities

1. **Transport and delivery of products safely** to clinical research sites, hospitals, health centers, pharmacy offices and patient homes all around the world.
2. **Cold chain guaranteed** through qualified active or passive packaging solutionse.
3. **Agreements** with national and international courier companies.
4. **Distribution direct** to site through our validated logistics partners.

Returns management

OUR REVERSE LOGISTICS MANAGEMENT SERVICES INCLUDE:

- ✓ Collection of used and unused medcation.
- ✓ Content control and reporting.
- ✓ Relabeling and/or reallocation.
- ✓ Storage in specific and restricted areas.
- ✓ Collection and removal of clinical waste.

Destruction management

POST-STUDY, WE MANAGE THE DESTRUCTION OF REMAINING STUDY MATERIALS:

- ✓ Certified destruction of medication of special control, cytostatics and biological products.
- ✓ Inertification and incineration.

OUR SOLUTIONS

Patient Support Programs (PSP)

Alcura focuses on making life easier for patients by helping them to manage and maintain their health at home, and increase in this way their adherence to the treatment.

The PSPs have a positive impact on different stakeholders, such as patients, doctors and manufacturers, as well as the healthcare system.

The PSPs boost the patient empowerment and support on its disease by reducing the hospital stress and improving adherence.

PSPs the value proposition of the drugs by offering value-added services both to the patients and healthcare system.

Optimization of healthcare resources is another benefit of the PSPs.

WHAT ALCURA'S PROGRAMS OFFER

HOME CARE

At Alcura, we design and develop programs to provide patient-based care at home to increase patient's quality of life (eg. support on home infusion).

HOME DELIVERY

Coordination of the delivery of commericialized drugs from the hospital to the specialized center. Support on the delivery of the IMP at patient's home (DtP).

CALL CENTER

Support on patients doubts and coordination of different services to ensure adherence's treatment. Pharmacovigilance services to ensure adverse events notifications.

TRAINING & COACHING

Development training sessions for patient's self-administration of complex drugs. Training of nurses and hospital events aimed at prevention campaign
